INTRODUCTION

I CONCORDANCE OF THE SANSKRIT DHĀTUPĀTHAS *

A concordance of the verbal roots listed in the various Dhātupāthas belonging to the different systems of Sanskrit grammar was first compiled and published as *Anhang IV* to his edition of the *Kṣīrataraṅgiṇī* by BRUNO LIEBICH It contains, in all, five Dhātupāthas, viz that of Pāṇini (with the three versions of the commentators, Maitreyarakṣita, Kṣīrasvāmin and Sāyana), the so-called Sarvavarman's Dhātupātha (reproduced from the Tibetan sources), and the Dhātupāthas of Candra, Śākaṭāyana and Hemacandra To these I have added another four Dhātupāthas in this work, giving thus a more-or-less complete picture of all the known important Dhātupāthas They are

1 J = The Dh P belonging to the Jainendra School Edited by Pandit Shri Lal Jain Shastri and published in the Sanatana Jain Granthamala Benaras, 1915

2 Kk = Kāśakṛtsna's Dh P Edited for the first time by N Narsimhia and published by the Deccan College Post-Graduate and Research Institute in the *Sources of Indo-Aryan Lexicography Series*, Poona, 1952

3 Kt = The Dh P belonging to the Kātantra school As there is no printed edition of the Dh P as far as my knowledge goes, I had to use MSS For this I have mainly used the excellent MS No 252 of 1884-86 of the Government of Bombay Collection (deposited at the Bhandarkar Oriental Research Institute), to which the numbering in this work refers I have also used two Bengali MSS belonging to the India Office Library viz No 773 and 774

4 V = Vopadeva s Dh P called *Kavikalpadruma*, edited by me and published by the Deccan College Post-Graduate and Research Institute, Poona, in the *Sources Of Indo-Aryan Lexicography Series*, Poona, 1954

A few points on which I have departed from the method followed by LIEBICH may be mentioned here Firstly, he has arranged the concordance with Pāṇini's Dh P (Bohtlingk's edition) as the basis with the result that only such roots as are read in Pāṇini's Dh P find place there The roots are there also given in the same sequence in which they are given in the Dh P i e *bhū edh* etc one class following another I have arranged the roots here in the alphabetical order, the practical value of which is self-evident Besides the roots read in the Pāṇinian Dh P, the additional roots listed by subsequent

---

* This *Concordance of the Sanskrit Dhātupāthas* and the *Index of Meanings* form a part of the author's thesis to be submitted to the University of Poona for the degree of Ph D

systems have been included here. Further, roots which have not been recorded by the indigenous grammarians but which nevertheless have actually occured in the Sanskrit literature in one stage or the other also find a place here. They have been mostly culled from (1) The *St Petersburg Dictionary*, (2) *Sanskrit-English Dictionary* by Monier Williams, and (3) the *Roots* by Whitney. Lastly a few roots posited by modern scholars are also given here. It will thus be seen that the present concordance is an attempt to give a more-or-less complete list of the Sanskrit roots.

For every root three particulars are given: (1) The present-class to which the root belongs, indicated by a Roman figure; this figure usually appears only in the second column (i.e. under B, where a root is not read in that Dh. P. it appears in the column where the first entry against that root might be). The absense of it in the subsequent columns on the same horizontal line means that the same figure is understood there also thus indicating that there is no change of class. In those cases where the Dhātupāthas differ in assigning a particular root to its present-class the entries of divergent cases are made on fresh lines with appropriate figures. Everywhere, on any one line entries pertaining to the same class alone appear. (2) The serial number (in Arabic figures) of the root in the particular class. This figure is naturally missing in the column under V since the arrangement of roots in the *Kavikalpadruma* is on an entirely different basis, viz. the alphabetical order of the final letter. (3) The voice in which the root is usually conjugated, as given in the Dhātupāthas—a new feature of the concordance. In this respect P stands for Parasmaipada, A for Ātmanepada and U for Ubhayapada. The column under Śa does not give this information since there is no indication (except in such cases where the Anubhandha *n* or *ñ* is used) as regards the voice in Śarvavarmans Dh. P. This also holds good as regards the roots of the tenth class in C.

There is some difference of opinion among the ancient grammarians themselves as regards the voice of the roots of the tenth class (excepting those which are specifically stated to be Ātmanepadins) in the Pāninian Dh. P. I have indicated them as Parasmaipadins (as also WESTERGAARD and BOHTLINGK have done) in view of the fact that commentators usually illustrate them only by the Parasmaipadin forms, and that the corresponding roots in the other schools like that of Śākatāyana or Hemacandra are definitely stated to be Parasmaipadins. For the opposite view that these roots must be regarded as Ubhayapadins, vide *Einfuhrung* III, p. 3.

WESTERGAARD has recorded a number of roots from other sources either as variants for or as additions to the roots of the Pāninian Dhātupātha. Many of these have crept into Bohtlingk's edition of the P. Dh. They have been here pointed out in the footnotes.

To avoid unnecessary confusion, the same editions that were employed by LIEBICH have been used here, the old numbering of roots

also kept intact Also the old abbreviations have been retained, with the sole exception that K here appears as Ks

II INDEX OF MEANINGS

Like its compaion-volume *Concordance of the Sanskrit Dhātupāthas* the present work, viz the *Index of Meanings* is also in a way a continuation of the work already started in this matter by BRUNO LIEBICH who has published in his *Materialien Zum Dhātupātha* (1921), inter alia, an index of meanings along with corresponding roots LIEBICH here restricted himself to only two Dhātupāthas, viz the one by Pānini (as found in the *Mādhavīya Dhātuvṛtti*), and that by Candra To these two I have added six more, viz, those of Jainendra, Kāśakṛtsna, Kātantra, Sākatāyana, Hemacandra and Vopadeva, thus exhausting, more-or-less the whole list of the important known Sanskrit Dhātupāthas The so-called Sarvavarman's Dhātupātha, with its meanings in the Tibetan, is of course not included here

A brief explanation of the plan of the Index might be given here After each meaning roots (arranged alphabetically) are given, followed by the symbols of the Dhātupāthas (arranged chronologically) A root and the Dhātupātha-symbol thus form, so to say, a unit If there are many roots against one meaning, a comma is given at the end of every such unit except the last where, of course, a full-point is used Whenever against one meaning there appear two or more consecutive roots all common to the same Dhātupātha(s) then instead of repeating the symbol(s) after every root it was thought better to read the symbol(s) only after the last root in the unit, the roots being read simply one after another without any puctuation mark between them

When a root is unanimously read in all the Dhātupāthas in the same meaning, then merely the root is given without any mention of the Dhātupātha, followed by a comma or a full-point as the case may be

It will thus be seen that a root is followed either by (1) the symbol(s) (when it is not common to all the Dhātupāthas and when the following root or roots, if any, are accompanied by different symbol(s), or (2) by a root or roots (when the symbol(s) happen(s) to be common), or (3) by a comma or a full-point (when the root is common to all the Dhātupāthas)

Besides the *Mādhavīya Dhātuvṛtti* there are two more commentaries on the Pāninian Dhātupātha viz the *Ksīratarangini* of Ksīrasvāmin and the *Dhātupradīpa* of Maitreyaraksita The three commentaries exhibit considerable differences in the matter of the text of roots and their meanings In the Index an unqualified P indicates that the particular statement (about the root being read in a particular sense) is applicable to the Pāṇinian Dhāupātha as appear-

ing in all the three commentaries. In cases where the commentators differ the symbols of the commentators are put in brackets after P to show which version of the Pāninian Dhātupātha subscribes to the particular view.

The word *all* (always in italics) always refers to the authors or to the Dhātupāthas, and never to the the roots--except in a single case viz. against the meaning *rodhane* where, as is self-evident, it refers to the roots. Similarly remarks regarding omission etc. always pertain, unless otherwise stated, to the immediately preceding root alone.

Lastly, there remains the pleasant task of offering my heartfelt thanks to Dr. S. M. KATRE for the invaluable guidance that I received from him in compiling this Concordance and the Index and to the authorities of the Bhandarkar Oriental Research Institute and the India Office library for having lent their MSS. which have been used here.

Poona, G. B. PALSULE

429 From here up to the end of the section of roots beginning with *b*, a bracket indicates, unless where otherwise explained, that the root is read with an initial *v* instead of *b*

430 The root is read as *baṭa* but illustrated by *bantati*

431 As L remarks, *badh* is the correct form, and not *bandh* as given by B

432 *bādh*

433 = *bhas*

434 Given explicitely only by V Others have indicated it only in a general way

578 *loch*

579 Does not belong to the P Dh

579a From here up to the end of the section of roots beginning with *v*, a bracket which is not otherwise explained in the foot-notes indicates that the root is spelt in that particular Dhātupāṭha with an initial *b* instead of *v*

580 = *vac*, BR

581 = *vañc*, BR

582 Cited by Wg from Kt and V Does not belong to the P Dh
